

SANDEEP GADAKARI

AI Product Management | Machine Learning | Predictive Maintenance | AI & Automation Solutions

Dubai, UAE | +971 50 349 6951 | +91 79759 52155 | sandeepgadakari2000@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Nationality: Indian | Visa Status: Visit Visa | Availability: Immediate Joiner | Languages: English

PROFESSIONAL SUMMARY

AI Product Manager (B.E. Civil Engineering + MBA Finance & Business Analytics, 2026) based in **Dubai**, available to join immediately. Identifies, scopes and ships AI and automation products that raise **operational efficiency and productivity**, from the business case to the live app. Built a **predictive maintenance platform** at **0.98 ROC-AUC** and a **Dubai cooling-cost predictor**, and delivered **6 C-suite-approved AI solutions** at a **USD 500M+ manufacturing group**.

CORE SKILLS

AI & ML: Generative AI, LLMs, CrewAI, LangChain, scikit-learn, Random Forest, NLP, time-series forecasting, predictive maintenance

Data & Engineering: Python (pandas, NumPy), SQL, Power BI, Tableau, Advanced Excel, ETL, JavaScript, Node.js, FastAPI, REST APIs, Git

Product & Business: AI product management, business cases, process automation, EBITDA impact analysis, stakeholder management

PROFESSIONAL EXPERIENCE

AI Product Management & Consulting (Intern) | One Sanjay Ghodawat Group, Kolhapur, India May 2026 - Jun 2026

- Owned analytics and AI product delivery for cross-functional **HR, supply chain and compliance** teams at a **USD 500M+ (INR 5,000 Cr+)** manufacturing conglomerate, shipping **6 C-suite-approved solutions**.
- Automated a formula-heavy **S&OP** planning cycle with a **Python (pandas, openpyxl)** pipeline over **217 SKUs** and **90,000+ rows**, cutting reporting from **hours to under 10 seconds**.
- Deployed an **HR attrition prediction model** (Random Forest, SMOTE, GridSearchCV, SHAP) showing managers which drivers put which employees at risk.
- Advised **DGM-level leadership** on dashboard architecture and **AI deployment strategy**, then owned **maintenance and enhancement** through user-feedback rounds.

Data Analyst (Intern) | Ashok Iron Works Pvt. Ltd., Belagavi, India

Mar 2026 - Apr 2026

- Traced a **60.28% attrition rate** across **94 employees** and **10 departments** of an **iron foundry** to its root cause.
- Built a **Tableau dashboard** for leadership surfacing **27% YoY revenue growth** and **214% PAT (net profit) growth**.

Business Analyst (Intern) | Etoe Transportation Infrastructure Pvt. Ltd., Bengaluru, India

Oct 2025 - Nov 2025

- Mapped operational processes across **5+ departments** and proposed **3+ automation opportunities** that cut **manual effort by 20%**.
- Reconciled **GSTR-1 and GSTR-2A** indirect tax (GST) returns across **17 state registrations** on a live **statutory compliance** deadline.

KEY PROJECTS

CoolScore Dubai: Apartment Cooling-Cost Predictor (Python, scikit-learn, FastAPI, Claude API, building physics)

[Live](#) | [GitHub](#)

- Predicted a Dubai apartment's **cooling cost before renting or buying** by pairing **ISO 13790 building physics** and **DEWA and district-cooling tariffs** with a **quantile ML model** trained on **40,000 simulated units** (R-squared 0.996).
- Shipped a live **CoolScore (A to E)** with **P10 to P90 AED ranges**, an **LLM listing parser**, and a **brokerage pricing and 90-day pilot plan**.

Kaizen-to-EBITDA Engine: Plant Predictive Maintenance (Python, scikit-learn, pandas, Streamlit, Plotly)

[Live](#) | [GitHub](#)

- Developed **dual Random Forest classifiers** predicting **60-minute failure** and **bottleneck risk** across **8 industrial assets** at **0.98 ROC-AUC** with a **50-minute median warning**.
- Converted risk scores into an auditable **EBITDA bridge** for engineers and finance, catching **30 of 38 breakdowns** at only **0.7 false alarms** per machine-day.

NiftyPulse: Multi-Agent LLM Research Orchestrator (CrewAI, LangChain, LiteLLM, Groq, Gemini, Streamlit, pandas)

[GitHub](#)

- Engineered a **3-agent CrewAI LLM committee** on live market data, with every number computed in **pandas** to **eliminate hallucination** and a **3-tier fallback ladder** for outages.

Argonaut: On-Device Fraud Detection Engine & Automation Bot (Python, scikit-learn, JavaScript, Node.js)

[Live](#) | [GitHub](#)

- Ported a **scikit-learn TF-IDF fraud classifier** to a **JavaScript runtime** for **on-device job-scam scoring**, with a **Node.js Telegram bot** turning user verdicts into training labels.

BBS Generator: Bar Bending Schedule Automation (JavaScript, Node.js, PDF parsing, WebGL, IS 456)

[Live](#) | [GitHub](#)

- Generated **bar bending schedules** and **rebar detailing** for **RCC members** from a structural grid or **plan PDF**, with a **dependency-free PDF parser**, **IS 456 design checks** and **3D member cages**.

EDUCATION & CERTIFICATIONS

MBA, Finance & Business Analytics | KLS Gogte Institute of Technology, Belagavi, India

2026

B.E., Civil Engineering | KLS Gogte Institute of Technology, Belagavi, India

2024

Certifications: AI Product Management, Duke University (Coursera) | SQL for Data Analytics & BI, Udemy | Tableau Certified Data Analyst, Udemy | NPTEL Elite, IIT Madras & IIT Kharagpur
